

## **Arizona's Health Current Information Exchange**

[Health Current](#), previously known as Arizona Health-e Connection, is Arizona's health information exchange, which connects about 400 Arizona organizations, hospitals, labs, behavioral and physical health care providers. Health Current allows care providers to securely share electronic health records (EHR) for their patients.

### **EHR and E-Prescribing Requirements**

- Behavioral health and physical health care providers are required to use Health Current to help ensure secure exchange of clinical information among all care providers.
- Care providers are encouraged to use electronic prescribing (E-prescribing).

Connecting you to electronic resources so you can have access to complete information about your patients can help you better coordinate their care.

### **Participating in Health Current**
