

**Facility Charges (G0463) Are Never Covered for Peer Group 1 and Other Certain Facilities**

For Peer Group 1 and other certain facilities, effective March 1, 2016, retroactive to April 1, 2015, hospital facility charges (G0463) will no longer be a covered Kansas Medical Assistance Program (KMAP) service. A separate notice was mailed to Hospitals affected by this policy on January 11, 2016.

When physicians/practitioners use outpatient hospital space for clinic services, the costs associated with the use of the rooms and supplies will be the responsibility of said parties to agree upon compensation terms.

Payments for code G0463 will be recouped retroactive to dates of service on and after April 1, 2015 for affected facilities. Providers will receive separate notices regarding any required recoupment after policy implementation on March 1, 2016.

**When G0463 is Considered a Reimbursable Service for Facilities not Affected by This Policy**

G0463 should only be billed as a reimbursable service by hospitals when physicians/practitioners utilize hospital space that is a hospital owned department for their clinic services. This primarily applies to rural settings where the physician/practitioner travels to different cities/towns and uses a hospital department room to see patients. G0463 should not be used for services provided in hospital owned clinics.
