TennCare Prescription Utilization Reviews

During recent TennCare reviews, registered Medicaid care providers have been identified as writing a significant number of prescriptions for our enrollees with no corresponding professional claim. This is a notice to all care providers as a reminder of the following:

- Any care provider registered with TennCare cannot accept cash payment from a TennCare enrollee beyond the authorized co-pay amounts. Doing so will result in care provider loss of participation in the TennCare program, in addition to other possible actions.
- Notices will be sent to care providers with high volumes of filled prescriptions with no professional claims.
