RED FLAGS

The Red Flags Rule says that health care providers need to help prevent medical identity theft. They must make sure patients are who they say they are. They want to make sure someone else isn’t using your health plan ID card. This means your provider might ask for your driver’s license or other photo ID. Be sure to take your ID with you when you get health care.

SEXUAL HEALTH

GET tested

LIFE GOES ON WITH HIV

HIV is the virus that causes AIDS. It is spread through blood, semen and other body fluids. Certain people are at higher risk for getting HIV. Having unprotected sex with multiple partners raises your risk. So does injecting illegal drugs.

There is no cure for HIV. But drug therapy is helping infected people live longer, healthier lives. That is why it is so important to get tested. People with HIV who take medicine for it can keep from getting AIDS for a long time. They can be careful about not spreading the virus.

AT RISK? Ask your doctor for an HIV test. Or, text your zip code to KNOWIT (566948) to find a free testing clinic near you.
quality counts

UnitedHealthcare wants all our members to be healthy. That’s why we have clinical quality improvement (QI) programs. These programs:

- HELP members with chronic illnesses get the care they need.
- WORK with pregnant women to have healthy babies.
- REMIND members to get important tests and immunizations.
- MAKE sure members get follow-up care after they are in the hospital.
- CHECK to see how certain illnesses are treated.

Part of QI is measuring how well these programs are working. We check doctors’ records. We look at claims data. We send surveys to members. We look at these results to see how we can do better. We share this information with providers and members.

eye SPY

DON’T LET DIABETES TAKE YOUR SIGHT

Diabetic retinopathy is the main cause of blindness in the U.S. It is a common complication of diabetes. It damages the blood vessels in the eye. Most of the time, symptoms do not start until the damage is bad.

Laser surgery can stop diabetic retinopathy from getting worse. But it can’t reverse the vision loss that already happened. That’s why it is so important to have a diabetic eye exam every year. It can catch diabetic retinopathy before you have symptoms.

The eye doctor will dilate your pupils with eye drops. Then he or she will take a look inside your eye. The test is quick and painless.

People with diabetes are also at higher risk for other eye diseases. These include cataracts and glaucoma. Keeping good control of your diabetes can help prevent these eye diseases.

IN CHECK Glucose monitors are covered under your durable medical equipment (DME) benefit. To find out how to get a glucose monitor, see your member handbook. Or, call Member Services at 1-800-587-5187 (TTY 711).
**screen stars**

MAMMOGRAMS ARE A MUST FOR WOMEN OVER 40

Two out of five women over 40 have not had mammograms in the past year. Are you one of these women? If so, what are you waiting for?

Breast cancer can be cured most of the time when caught early. The best way to catch it early is with regular screenings.

Mammograms are X-rays of the breasts. They can detect breast cancer years before you can feel it. You should have your first mammogram when you turn 40. After that, you should have mammograms every 1–2 years. Women at high risk for breast cancer may start screenings earlier. Talk to your doctor about when you should be screened.

---

**THE kidney DIRE**

**WHY IT MATTERS WHAT YOU EAT**

If you have kidney disease, your doctor probably told you to follow a special diet. Following the diet decreases the stress on your kidneys. You should be careful to have only small amounts of:

- **PROTEIN** — to decrease the protein load on the kidneys and slow down the kidney disease
- **SODIUM** — to improve blood pressure control and to avoid fluid buildup
- **POTASSIUM** (for some people) — to avoid dangerous heart rhythms

Some people may also need to restrict fluids. And if you have diabetes along with kidney disease, you may need a low-carbohydrate diet, too. Your doctor will also watch your calcium and phosphorous levels. Your doctor can do tests to see how your diet is affecting the health of your kidneys.

---

**DIET PLAN** Do you need help understanding how to eat the best diet for your kidneys? Ask your doctor to refer you to a dietitian.

---

**BE WHOLE** Janet’s Law says that health plans must pay for reconstruction for women who have breast cancer surgery. Do you have questions about your benefits for breast cancer detection and treatment? Call Member Services at 1-800-587-5187 (TTY 711).
YOU CAN PREVENT SHINGLES

Shingles is a common disease that causes a painful skin rash. It can lead to long-term nerve pain or other complications. Half of the people who get it are over age 60.

Shingles is caused by the varicella zoster virus. This is the same virus that causes chicken pox. There is a vaccine that can prevent shingles. It is called Zostavax. It is recommended for people over age 60 with healthy immune systems.

Ask your doctor if you should get a zoster vaccination. It only needs to be given once.
game plan

It’s important to understand how your health plan works. Knowing this can help you get the most out of your benefits. It can help you avoid having to pay for some of your health care. Read this special insert for information about UnitedHealthcare. Keep it for future reference.
MEMBER rights and responsibilities
AS A UNITEDHEALTHCARE MEMBER, YOU HAVE CERTAIN RIGHTS AND RESPONSIBILITIES. IT IS IMPORTANT THAT YOU FULLY UNDERSTAND BOTH YOUR RIGHTS AND RESPONSIBILITIES.

YOU HAVE A RIGHT TO:

- be treated with respect and dignity by UnitedHealthcare personnel, network physicians and providers.
- privacy and confidentiality for treatments, tests or procedures you receive and all records and communications to the extent of the law.
- voice concerns about services and care you receive.
- register complaints and appeals concerning your health plan or the care provided to you.
- receive timely responses to your concerns.
- participate in candid discussions with your physicians about appropriate and medically necessary treatment options for your conditions, regardless of cost or benefit coverage.
- be provided with access to health care, physicians and providers.
- obtain a second opinion for medical and surgical procedures.
- participate with your doctor and other caregivers in decisions about your care.
- refuse treatment and not have it affect your future treatment.
- receive information about the minimum length of stay for mothers and newborns, to the extent required by law.
- make recommendations regarding the organization’s member rights and responsibilities policies.
- receive information about UnitedHealthcare, our services, network physicians and providers.
- be informed of and refuse to participate in any experimental treatment.
- have coverage decisions and claims processed according to regulatory standards.
- choose an advance directive to designate the kind of care you wish to receive should you be unable to express your wishes.
- change primary care physicians at any time.

YOUR HAVE A RESPONSIBILITY TO:

- know and confirm your benefits prior to receiving treatment.
- choose a primary care physician (PCP).
- contact an appropriate health care professional when you have a medical need or concern.
- show your UnitedHealthcare ID card before receiving health care services.
- pay any necessary co-payments at the time you receive treatment.
- keep scheduled appointments.
- provide information needed for your care.
- follow agreed-upon instructions and guidelines of physicians and health care professionals.
- use emergency room services only for injury or illness that, in the judgment of a reasonable person, requires immediate treatment to avoid jeopardy to life or death.
- **participate in understanding** your health problems and developing mutually agreed upon treatment goals.
- **know what benefits** and which providers are covered by UnitedHealthcare and which are not.
- **notify** UnitedHealthcare’s Member Services department and your local DHS office of changes in name, address, telephone number, family status or if you have other insurance.
- **call Member Services** when you have questions about your eligibility, benefits, claims and more.
- **call Member Services** to verify that your primary care physician or health care provider is participating in the UnitedHealthcare Rite Care and Rhody Health Partners network before receiving services.
**THE waiting GAME**

**HOW LONG YOU SHOULD WAIT FOR AN APPOINTMENT**

No one likes waiting. Especially when you don’t feel well. That’s why we ask doctors who participate in UnitedHealthcare to see patients on time. How fast they should see you depends on why you need the appointment.

To make an appointment, just call your primary care provider (PCP). The doctor’s name and phone number are on your ID card. Tell them why you want to see the doctor. We ask providers to see you within the following time frames:

<table>
<thead>
<tr>
<th>TYPE OF APPOINTMENT</th>
<th>EXAMPLES</th>
<th>APPOINTMENT STANDARDS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Emergency care</td>
<td>Chest pain, asthma attack, serious injury</td>
<td>Immediately</td>
</tr>
<tr>
<td>Urgent care</td>
<td>Stomach pain, ear infection</td>
<td>Same day</td>
</tr>
<tr>
<td>Regular routine care</td>
<td>Follow-up visits, blood pressure check</td>
<td>14 days</td>
</tr>
<tr>
<td>Preventive care</td>
<td>Checkup, sports physicals</td>
<td>4 weeks</td>
</tr>
<tr>
<td>After hours access</td>
<td>Change in condition, urgent care</td>
<td>24 hours/7 days a week for primary physicians</td>
</tr>
</tbody>
</table>

If your doctor is not meeting these appointment standards, tell us. Call 1-800-587-5187 (TTY 711). Already have an appointment? Don’t forget to go. If you need to change or cancel an appointment, call the doctor’s office. Try to call at least one day before the appointment.

**UM ... WE CAN EXPLAIN**

UnitedHealthcare does utilization management (UM). All managed care health plans do. It’s how we make sure members are getting the right care at the right time and in the right place. If you have questions about UM, you can talk to our staff. Just call toll-free at 1-800-587-5187 (TTY 711). You’ll talk to a real UM staff member whose name and job title you will know. If you need to leave a message, someone will call you back.
