

HealthTALK

FALL 2018

Plan to quit.

Every November, the Great American Smokeout asks everyone to quit smoking. You can quit for just that one day. Or it could be the first day of a permanent, healthy change.

There is no way to safely use tobacco. Make a plan to quit on November 15. Ask your provider for help quitting. Or call **1-866-784-8454** or visit **quitnow.net** to learn more.

Mammograms save lives.

Today, there are more than 3 million breast cancer survivors in the U.S. This is because more women are getting mammograms. A mammogram is an x-ray of the breast. It is used to find breast cancer early, before you notice a lump.

Getting a mammogram on schedule can help you beat cancer if your doctor finds it early. When caught early, breast cancer is often curable. If you are over 40, talk to your health care provider about your breast cancer risk factors. These include your family and personal health history, ethnicity and lifestyle. Together, you can create the best screening schedule for you.

Are you at risk? Talk to your doctor about your risk factors for breast cancer. For help scheduling an appointment or finding a provider, call Member Services toll-free at **1-877-743-8731**, **TTY 711**.

Behavioral health.

Not all illnesses are physical. Getting the mental health care you need is important.

If you or your children are struggling with mental health, ask your primary care provider (PCP) about seeing a behavioral health specialist. A behavioral health specialist can treat mental disorders such as:

- Anxiety disorders.
- Depression.
- Attention deficit hyperactivity disorder (ADHD).
- Seasonal affective disorder (SAD).
- Substance use disorder.

To make an appointment, call the behavioral health provider's office directly. When you call to make an appointment, be sure to tell the office why you need to see the provider. This will help make sure you get the care you need, when you need it.

If you or someone you know is thinking about suicide, seek help right away. Call **911** if someone is in immediate danger. Or go to the closest emergency room. Prior authorization is not required for emergency services.

 **Get help.** To learn more about your behavioral health benefits, call Member Services toll-free at **1-877-743-8731, TTY 711**. For help with behavioral health problems, call NurseLineSM toll-free 24 hours a day, 7 days a week at **1-877-370-4009, TTY 711**.

Be flu free.

Get a flu shot this season.

The flu virus is very common. An annual flu shot is the best protection. You and your children aged 6 months and older should get one each year. You need a flu shot each year because there are different kinds of flu every year.

If you get the flu, it could cause serious complications. You may need to be hospitalized. It can even cause death. People who have ongoing medical problems are more likely to get the flu.

Follow these tips to help prevent the flu:

- Wash your hands often with soap and water. Or, use an alcohol-based hand sanitizer.
- Don't touch your eyes, nose or mouth unless you have just washed your hands.
- Eat well, exercise, drink lots of water and get enough sleep.
- Try to avoid close contact with people who are sick.
- Cover your nose and mouth when you cough or sneeze.

 **Your best shot.** There is no cost to you for flu shots. The best place to get one is at your primary care provider's (PCP's) office. You can also get one at any clinic or store that accepts your plan. Call Member Services toll-free at **1-877-743-8731, TTY 711**, or NurseLine 24 hours a day, 7 days a week at **1-877-370-4009, TTY 711**, for more information. Visit myuhc.com/CommunityPlan or use the UnitedHealthcare **Health4Me**[®] app to find a location near you.

Members only.

You can get important information about your health plan anytime at **myuhc.com/CommunityPlan**. At this secure site, you can view your ID card, find a provider, take a health assessment, learn about your benefits and more. Register today and start getting more from your benefits. It's quick and easy:

1. Go to **myuhc.com/CommunityPlan**.
2. Click on "Register Now." You will need your member ID card, or you can use your Social Security number and date of birth to register.
3. Follow the step-by-step instructions.

Make your wishes known.

You have the right to say yes or no to procedures, tests, and treatments. But what would happen if you couldn't make these health care decisions? Do you have written instructions? Have you chosen a family member to decide for you? This is called an advance directive.

Make your wishes known in advance. You could give your doctor the name of someone you trust. You can also write your wishes down. There are forms you can use to make this easy.

Write it down. Ask your doctor, clinic or hospital for an advance directive form. You can also find simple forms online.

Heart smart.

Know your cholesterol numbers.

Cholesterol is a fatty substance in your blood. HDL is called "good" cholesterol. LDL is the bad kind. Keeping your cholesterol levels healthy is a great way to keep your heart healthy. High cholesterol raises your risk for heart disease and stroke.

Ask your doctor about the right levels for you. Ideal numbers are based on your gender and heart disease risk factors. People with diabetes need to pay close attention to their LDL levels.

You can control your cholesterol. A healthy diet and exercise can keep it low. Medication can help lower it if it is too high.

Get tested. The American Heart Association recommends all adults age 20 or older have their cholesterol checked every 4 to 6 years. People with diabetes or other risk factors should get tested each year.

Resource corner.

Member Services: Find a doctor, ask benefit questions or voice a complaint, in any language (toll-free).

Getting the right care.

Where to go for the care you need.

Choosing the right place to go when you are sick or hurt can help you be seen faster. It is important to choose a primary care provider (PCP). Make an appointment to see your PCP before you have an urgent need.

When can your PCP treat you?

For most illnesses and injuries, your PCP's office should be the first place you call when you need care. You might get an appointment for later that day. You may be given advice for self-care. Your PCP could call in a prescription to your pharmacy. You can even call at night or on weekends.

When should you go to urgent care?

If you cannot get in to see your PCP, you can go to an urgent care center. Urgent care centers take walk-in patients. They treat many kinds of illnesses and injuries. They can perform some kinds of diagnostic tests.

When should you go to a hospital emergency room?

Emergency rooms are for major medical emergencies only. Go there only when you think your illness or injury could result in death or disability if not treated right away.

Need help? Call Member Services toll-free at **1-877-743-8731, TTY 711**, or NurseLine 24 hours a day, 7 days a week at **1-877-370-4009, TTY 711**. Need to find a provider? Visit our member website at **myuhc.com/CommunityPlan** or use the **Health4Me** app.

UnitedHealthcare Community Plan no da un tratamiento diferente a sus miembros en base a su sexo, edad, raza, color, discapacidad o origen nacional.

Si usted piensa que ha sido tratado injustamente por razones como su sexo, edad, raza, color, discapacidad o origen nacional, puede enviar una queja a:

Civil Rights Coordinator
UnitedHealthcare Civil Rights Grievance
P.O. Box 30608
Salt Lake City, UTAH 84130
UHC_Civil_Rights@uhc.com
